Swedish citizen – no work permit required in Norway · Available for 2/4 offshore rotation

Profile

Process and thermal operator with over five years of experience in oil-field steam generation, boilers, separators, pumps and compressors at SIPC Syria (Sinopec) and Dublin International Petroleum, including as night-shift process supervisor on a 14-day rotation, responsible for a main station, six sub-stations and a team of 70 people. Holds a Master of Science in Applied Data Science and a B.Sc. in Computer Engineering, and has hands-on welding experience in stainless steel, steel and aluminium. Safety-minded, used to shift work and pressure, and looking for an operator role on a rotation schedule in Norway.

Core Competencies

Operations	Steam boilers and steam generators, furnaces, heat exchangers, separators, pumps, compressors, storage tanks, water injection facilities, instrumentation and control systems
Process control	Monitoring and adjusting pressure, temperature, water level and flow rates to keep operations stable and efficient
Safety	Pressure relief valves, temperature controls, emergency shutoff procedures, confined space, working at height, safe chemical handling, NORM awareness
Maintenance	Routine inspections, troubleshooting and basic repair of pumps, valves and control systems
Leadership	Night-shift process supervisor on a 14-day rotation; led a team of 70 people; clear communication under pressure
Welding & repair	Welding of stainless steel, steel and aluminium; accident damage repair of trailers (Sandströms Center AB)
Digital & data	Python, SQL, PySpark, machine learning, embedded C/C++, Tableau – relevant for condition monitoring, predictive maintenance and process data analysis

Operations Experience – Oil & Gas

Process Supervisor (night shift)

Jan 2012 – Oct 2013

Oudeh Petroleum Company (SIPC Syria, Sinopec), Syria

- Worked a back-to-back rotation (14 days on / 14 days off) on the night shift.
- Responsible for the main station, 6 sub-stations, the water pool used for injection into the ground, and all facilities connected to the main station.
- Oversaw 12 storage tanks: 2 of 2,000 m³ and 10 of 1,000 m³ (14,000 m³ in total).
- Led and coordinated a team of 70 people, keeping operations safe and stable under pressure.

Boiler Operator

Jan 2011 – Dec 2011

Oudeh Petroleum Company (SIPC Syria, Sinopec), Syria

- Operated and controlled steam boilers, adjusting pressure, temperature and water levels to maintain optimal performance.
- Performed routine maintenance, troubleshooting and repair of pumps, valves and control systems.
- Managed safety systems: pressure relief valves, temperature controls and emergency shutoff procedures to prevent incidents.

Production Operator

Feb 2010 – Dec 2010

Oudeh Petroleum Company (SIPC Syria, Sinopec), Syria

- Operated oil and gas production equipment: pumps, separators, compressors and control systems.
- Monitored and adjusted pressure, temperature and flow rates to optimise output.
- Carried out routine inspections and basic repairs to prevent downtime.

Thermal Operator

Sep 2008 – Jan 2010

Dublin International Petroleum Limited, Syria

- Operated and maintained furnaces, boilers, heat exchangers and other thermal processing equipment.
- Used temperature controls, pressure gauges and monitoring systems to keep operations safe and stable.
- Identified and resolved operational issues in thermal systems efficiently.

Technical and Digital Experience

Production Support – Material Handling and SMT**Jan 2025 – Jun 2026***Axis Communications, Lund, Sweden*

- Managed material handling, inventory control and production preparation for network and security hardware.
- Performed precision through-hole (THT) soldering on specialised hardware.

Graduate Research Assistant – Master’s Thesis**Sep 2025 – Jun 2026***ASAxLab, Malmö University, Malmö, Sweden*

- Built a real-time multi-camera tracking system (YOLOv11, ByteTrack, Re-ID) with an edge-to-center architecture.
- Designed the system for GDPR compliance using privacy-by-design data minimisation.

Teaching Assistant (part-time)**Sep 2024 – Jan 2026***Malmö University, Malmö, Sweden*

- Supervised computer science and engineering students in laboratories and designed updated lab exercises.

Embedded System Developer and Trailer Damage Repair Technician2022 (part-time); Sep 2023 – Aug 2024*Sandströms Center AB, Helsingborg, Sweden*

- Supported development, coding and troubleshooting of real-time embedded systems.
- Repaired accident-damaged trailers at a trailer service workshop, and learned welding of stainless steel, steel and aluminium.

Mobile and Computer Technician**Mar 2016 – Oct 2017***Helsingborg Technique Centre, Helsingborg, Sweden*

- Diagnosed and repaired hardware, software and network problems; replaced screens, batteries, drives and boards.

Electronic Technician**Aug 2002 – Aug 2008***Syria*

- Six years of soldering, circuit board assembly and repair of electronic systems; read schematics and technical manuals.
- Used oscilloscopes, multimeters and signal generators for diagnostics and performance testing.

Education**M.Sc. Applied Data Science**, Malmö University**Sep 2024 – Jun 2026****B.Sc. Engineering, Computer Science**, Malmö University**Aug 2020 – Jun 2024**

Front-End Development programme, Helsingborg

2018**Training, Certificates and Licences**

- Oil Well Steam Injection Programme
- Water Treatment for High-Pressure Steam Generators
- Oil Treatment
- NORM Awareness in the Oil and Gas Industry
- Confined Space · Working at Height · Safe Chemical Handling
- Overhead crane · Boom lift (A1–A3) · Driving licence, category B

Languages

Arabic (native) · Swedish (fluent) · English (fluent) · Kurdish (conversational)

Awards

First place, True Challenge Hackathon (Helsingborg Mashup)

2018

Certificate of Research Merits, Malmö University

2026
